-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 26, 31-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 26 is indefinite in that it fails to further limit the device and is merely directed to the intended use of the device. The claim is directed to the system as claimed in claim 19, however all that is further added is directed to the intended use of the system and provides no further structural limitations of the system. Claims 31-32 are indefinite in that they are dependent on cancelled claim 30, making it unclear what the correct dependency should be.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-2, 5, 7, 9-10, 12-13, 19, 24, 26, 34-35 are rejected under 35 U.S.C. 102(b) as being anticipated by Garay et al (4,925,446).

Garay et al discloses an expandable balloon (11) having a torridal shape including a hole (28) and an insert (13) configured to be received in the hole. The device has a magnetic portion (25). The device includes storing and releasing at least one compound into the body (cartridge 13).

Claims 1-29, 31-38 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Yachia et al (6,398,718).

Yachia et al discloses a device used to treat incontinence having an expandable balloon (100) including a hole or chamber and an insert containing one or more substances to be released into the body, Including drugs, antibiotics or radioactive substances. The device includes a magnetic material (115), self sealing valve (205), an imaging device (119) and transmitter (110) for transmitting signals to a remote receiver (111) which is connected to a processor and/or display (112, 113). The device also includes one or more elements (214) to measure one or more parameters, a hygienic pad (claim 28).

Claims 1-2, 5, 7, 19-20, 24-26, 33 are rejected under 35 U.S.C. 102(e) as being anticipated by Holzer (2002/0151923).

Holzer discloses a device for treating incontinence having an expandable balloon (4) including a hole and an insert (1) that is received and secured in the hole. The device includes a magnetic portion used with an external immobilizing member that includes a magnetic element to immobilize and hold the device at a desired location.
